**ADDITIONAL INFORMATION SUPPORTING NJD** (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

The subject wetland is has been categorized as a lowland hardwood forest. This wetland is approximately 4,250 square feet in size, and is dominated by riverbank grape, buckthorn, green ash, and box elder, with a sparse reed canary grass under story.

The subject wetland lies entirely within Section 25 of Township 5N, Range 21E., Milwaukee County, Wisconsin. As such, the wetland boundaries lie entirely within the State of Wisconsin (intra-state wetlands). This wetland does not display any connection to, nor is it considered adjacent to (separated by roadway or other anthropogenic structure) any waters of the U.S. The nearest connection to any waterway (a non jurisdictional roadside ditch) is approximately 500 feet away; therefore, this wetland is considered isolated.

The wetland is not, nor is it likely to be, used by interstate or foreign travelers for recreation, industry, or commerce. The wetland lies on private property, without any public access. In addition, the wetland does not contain fish or shellfish which could be taken and sold. For these reasons, no commerce connection to the wetland has been established.

No other wetlands were located within the property boundaries
